SUMMARY

I'm a Front End Web Developer in Vancouver, BC. I'm skilled in HTML, CSS, JavaScript and WordPress development.

I have a Biomedical Engineering background. I developed an algorithm for processing signals from bioimpedance spectroscopy in MATLAB and created an MVP web application using PHP, Apache and MySQL, which was designed to be implemented in a hospital.

I like to have experience and knowledge from many various fields and I'm always keen on expanding my skill set. I'm currently working on learning React.js
